When I acquired my bootleg HFM (Harmonic Frequency Modular) Device from Raul on the dark web, it came with a collection of safe harmonic frequencies and a stern warning.
The device's ability to access higher frequencies was intentionally restricted by Multiverse Protocol and legal regulations, as these frequencies are primarily used for logistical teleportation within the Lower Multiverse.
This functionality was disabled prior to the importation of these units by smugglers, highlighting the risks involved in illegally using such devices.

The accompanying warnings indicate that while tuning your HFM Device to lower frequencies is technically permissible, it is strongly advised against.

This caution stems from the fact that casual users, even those only observing visually, may not be adequately prepared for the potentially overwhelming sights they could encounter.

As the frequency decreases, users delve deeper into the intricate macro world of the sub-Multiverse, which can lead to unexpected and possibly unsettling experiences.

Driven by my assertive nature and my role as a consumer advocate, I embarked on a quest to uncover the underlying issues that had been troubling me.

With determination, I delved into the complex and often confusing realm described in the user manual as the sub-Multiverse, ready to confront whatever challenges lay ahead.

My experiment began once I settled into a back booth at the renowned KitKat Gentleman's Lounge and Laundromat.

I chose this familiar setting deliberately, anticipating that if things went awry, I

would have friendly faces around to support me.
This was crucial, especially since I wanted to avoid the high costs of an emergency medical technician and a potential hospital stay, particularly given that my health insurance had been suspended due to a misunderstanding regarding my immigration status - as, I had inadvertently suggested that I was an undocumented resident rather than a citizen in order to receive emergency Medicare dedicated to undocumented individuals.
I brought along a substantial supply of

paper and crayons to capture the remarkable sights I encountered.
Previously, I realized that the Harmonic Membrane, which physically separates us from the Multiverse, interferes with modern camera electronics, causing fogging and distortion.
This unique experience made me appreciate the simplicity and creativity of traditional art tools for documenting my journey.
At the request of WWWG's legal advisor, Ms. Kimmie, I must present this important disclaimer: the illustrations included may be unsettling for those with high Social Credit Scores
